About GTI Infotel Pvt. Ltd.

About Us:

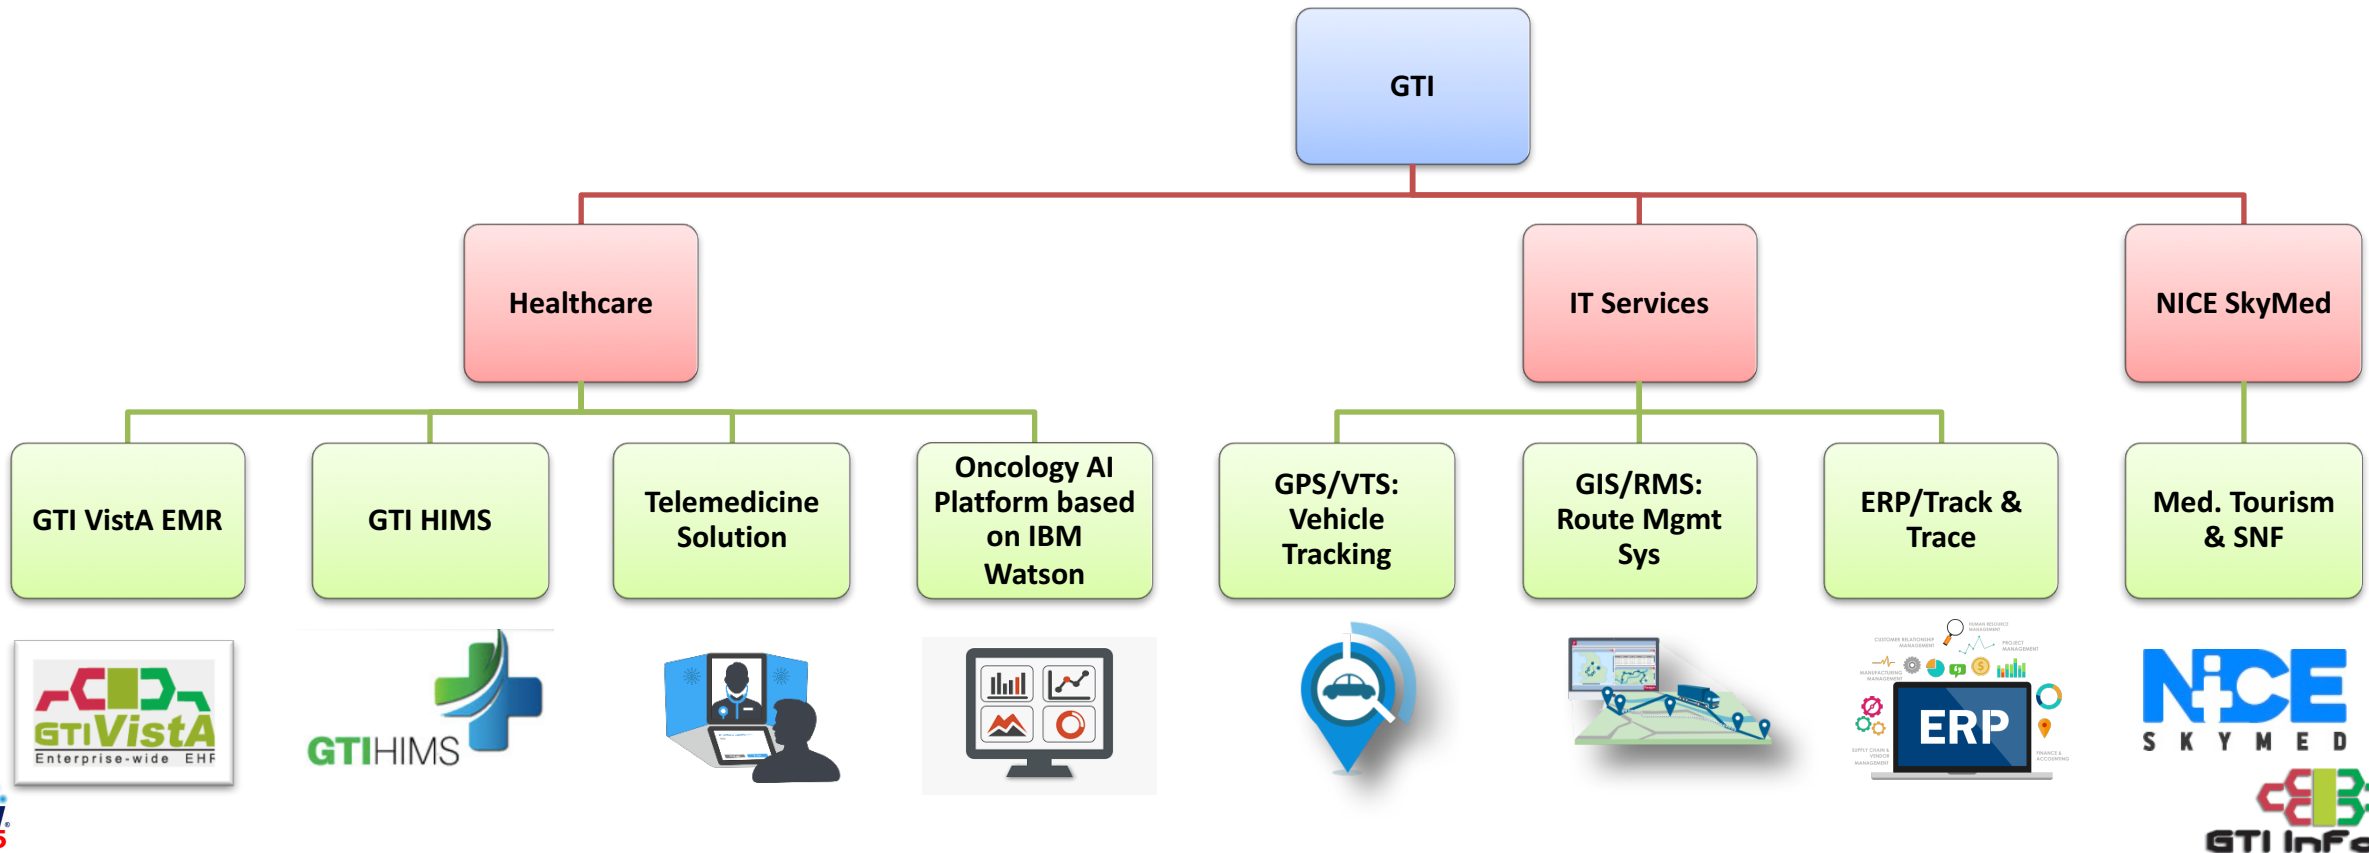

- Established in 2008
- A CMM L5 & ISO 9001:2015 Co.
- HQ in Noida/Delhi
- Subsidiary GTI Infotel, Inc. in the US
- 200 employees worldwide

Recognition & Awards:

- **Paper Presentations:** Vista Community Meet, Fairfax, VA & Sacramento, CA, HIMSS, AIIMS, IIHMR & others
- **Awards:** OSEHRA, eIndia 2010, eIndia 2011, eHealth Expo 2011, mBillionth South Asia 2010 & IETE Gadadhar Memorial

Technology Expertise:

- **DB:** SQL, PostgreSQL, GT.M, Cache & Oracle
- **Tech:** Java, JavaScript, PHP, C#, C++, .Net
- **OS:** Windows & Linux
- **Mobile:** Android & iOS
- **AI:** IBM Watson

GTI Infotel is proud to be a part of the ISO AND CMMI family of standards is a guideline on good quality management practices. This standard consists of standards and guidelines relating to quality management systems and related supporting standards.

The adoption of a quality management system is a strategic decision of GTI Infotel. The design and implementation of GTI Infotel's quality management system is influenced by:

- Our environment
- Varying needs
- Objectives
- Products or services
- Processes
- Size and structure

GTI GIS/GPS Products/Services & Major Implementation:

GTITRACKING

GPS Tracking: Features

INCREASE DRIVER ACCOUNTABILITY

Our GPS tracking devices manage historical track, Off-hour monitoring, speed alerts, over stoppage alerts.

TRACK YOUR FLEET IN REAL TIME

Our Gpstracking devices manage Speed and direction, Current Vehicle Status, Driving View, Street/Satellite View

ORGANIZE YOUR BUSINESS

Gpstracking devices keeps your schedules, invoices, quotes, customer information, and more, in one location, the cloud, so it's available to you anytime and anywhere.

LOCATION ACCESS FROM ANYWHERE

Manage and communicate with your fleet from any device so that you are always on top of what's happening.

IMPROVE FLEET-WIDE PRODUCTIVITY

Know where your drivers are and what they are doing at all times to maximize output. Through our devices you can quickly delve directly into the location and direction of each vehicle.

CUSTOMIZE YOUR GPS FLEET TRACKING DATA

Receive the information you want, when you want it, the way you want to see it.

TRACK START/STOP TIMES OF DRIVER ROUTES

Gpstracking devices track driver routes.

REDUCE FLEET COST

Our Gpstracking devices manage ideal Time, Start/Stop Reports, Ignition Reports, Maintenance Reports.

GPS/GIS: Other Modules

ADMIN MANAGEMENT MODULE

In Admin management module you will be creating your company account. All the details about your company like General details, Registration details and Other details of the branch or division of your company could be entered through this form.

OPERATION MANAGEMENT MODULE

Operation management module in GTI ERP for fleet management provides a collaborative environment for performing day-to-day tasks. Operation Management module covers Daily Vehicle Transactions. This module helps track the vehicle and availability.

TYRE INVENTORY MANAGEMENT MODULE

Inventory of Tyre in GTI ERP for fleet management is maintained through tyre inventory management module section. Here every details of new tyre is captured along with manufacturer name, tyre number, branch where it is received etc.

BATTERY MANAGEMENT MODULE

Battery Management Module gives you clear visibility to the integrated effect of current and future supply and demand, thereby enabling you to make better decision about purchase and reduce excess and obsolete inventories.

CONTRACT MANAGEMENT MODULE

Contract Management module in GTI ERP for fleet management is a transportation contract management tool designed to boost business power by cutting down on manual workload. It is user-friendly transport contract management tool and can easily be integrated with your business systems.

STORE MANAGEMENT MODULE

Stores management module provides a powerful and flexible set of features to help you manage and report your inventory information. Inventory Management in GTI ERP for fleet management facilitates processes of maintaining the appropriate level of stock in a warehouse.

PURCHASE MANAGEMENT

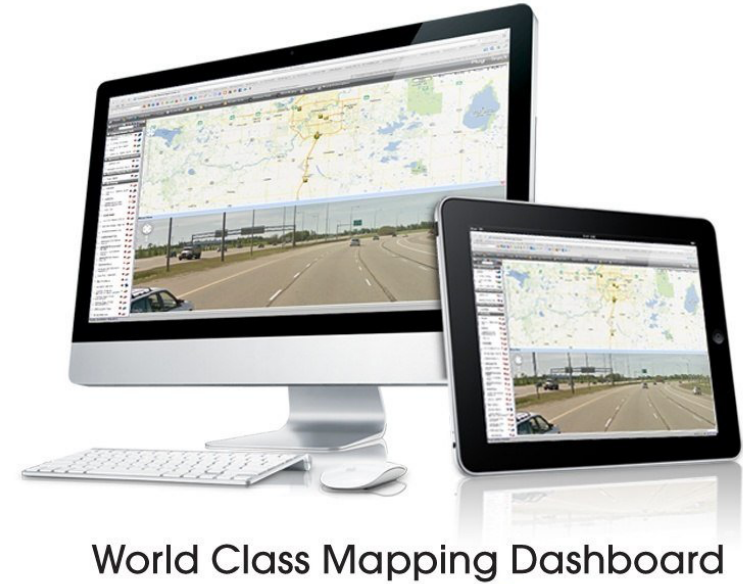

Purchase management module in GTI ERP for fleet management streamlines procurement of required Vehicle spare parts and other Non Inventory Materials. Purchase module is tightly integrated with the inventory control and production planning modules.

FUELING MANAGEMENT MODULE

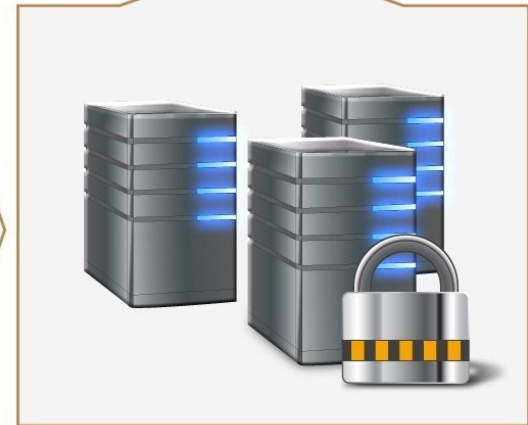

Average fuel consumption from destination to destination for different kind and type of vehicles are captured in the master file. Facility for defining the tolerance limit of fuel consumption from destination to destination is also defined in the master.

About GPS Tracking System & how does it work?

- Location
- Time
- Voltage
- Speed
- Direction
- RPM
- Fuel Consumption
- Odometer
- Excessive Idling
- Aggressive Acceleration
- Aggressive "Hard Braking"

Real-Time Telematic Reports

Applications

AUTO RICKSHAW SYSTEM

OUTDOOR MOBILE ADVERTISING

SOLUTION SPECIFIC APPLICATION DEVELOPMENT

Often, off-the-shelf software applications are too generic to support an organization's specific needs efficiently. With a sound data foundation in place, several applications can be purchased, developed, and/or customized to help automate repetitive tasks, perform spatial analyses and modelling. GTI develops these applications to be standalone GIS applications or embedded into an existing application. They can either be Windows-based or web-based applications. GTI develops such solution specific application development

DATA RELATED SERVICES

GTI undertakes GPS, DGPS, Property, Pipeline and Utilities survey and have successfully completed numerous projects. We assist clients in finding appropriate existing data sources and compiling these varied data into a unified GIS database. The following data related services are offered by GTI:

- Data Collection
- Data Migration
- Data Modeling
- Data Creation

REMOTE SENSING & SATELLITE IMAGE PROCESSING

We specialize in the generation, editing and maintenance of data for GIS and offers the full range of services necessary for successful geospatial data implementation. Our Geo-Spatial services include:

- Pipeline Mapping
- Land use / Land cover Mapping
- Environmental Applications
- Urban Mapping
- Utility Planning

GEOSPATIAL TECHNICAL SERVICES

We specialize in the generation, editing and maintenance of data for GIS and offers the full range of services necessary for successful geospatial data implementation. Our Geo-Spatial services include:

- Conversion
- Data Integration
- Image Processing
- Field Survey
- Mobile Mapping
- Enterprise GIS

GPS Tracking & GIS based GEO-RTD at Indian Oil with over 10,000 trucks & 35,000 km mapping

VEHICLE TRACKING SYSTEM(VTS)

GTI providing Vehicle Tracking system with end to solution, scope of work given below:

- Provision of Vehicle Mounted Units and Vehicle Tracking System
- Testing and commissioning of Vehicle Mounted Units and Vehicle Tracking System
- Replacement of Vehicle Mounted Units (whenever required)
- Operation of VMU and providing customized exception reports for end-to-end solution
- Providing services for route mapping.
- Also mobile app to all transporters / concerned IOCL officials for tracking purposes.
- Providing training to officers and distributors/Vendors once in a year.

VERIFICATION OF ROUND THE TRIP DISTANCE(RTD)

- Route mapping using GPS/GIS/Remote Sensing based identification between LPG Bottling Plant/Bulk-LPG Loading Location to other LPG Bottling plants/distributor's godown/ Retail Outlets(ALDS)/Consumer(Bulk LPG).
- Providing GIS Software for RTD Calculation, inter alia having the following specifications;
 - Customization application software.
 - Point to point query.
 - Display of map with route length, route distance and segment wise distance.
 - Display of district wise LPG Godowns/ ALDS/Bulk customers.
 - Display of supply point wise Loading & unloading sources / LPG Bottling plants/ LPG Godowns/ ALDS / Bulk customers.
- Training to IOC personnel/Vendors.

TRAINING

Training on the following aspects provided to IOCL personnel, apart from provision of Administration & User Manuals:

- User Administration – Add/modify/delete users and assignment roles, etc.
- Identifying and plotting new supply or delivery point on the map.
- Identifying and plotting new route from supply to delivery point on the developed GIS map and calculating its distance.
- Master Maintenance - Add/modify/delete various masters like Supply location master, Bulk LPG loading/ unloading sources, LPG Godowns , ALDS & bulk customers, etc.
- Print Management: Above list is only indicative and not exhaustive.
- All the trainings by GTI conducted at IOCL premises, at the option of IOCL's date and time.

Major GIS/GPS Case Studies

GEO RTD SYSTEM

ROUTE MAPPING: for identifying the shortest route for transportation between the Origination and end point/retail outlet/destination, asset mapping for the distribution/sales network entities to optimize Clients resources for entire State and of all destinations to which supplies sent from its Origination and from all terminals/depots, that supply petroleum/Gas/Healthcare/FMCG/etc. products across the state (it can be one state or multiple states).

- Round Trip Distance from the point of commencement i.e. a supply depot to destination point i.e. a Go-Down/ALDS & returning back.
- Web based system with the ability to add ALDS based upon the lat/long & generate routes.
- System provides three different all weather motorable routes along with Round Trip Distance from Supply Depot to Go-Down/ALDS using GIS based Route Management Software & Maps.
- System to generate Forms along with POI's in the form of PDF
- Enterprise System provides login access to all levels of user.
- System provides interface to upload all Forms for approval & rejections starting from Field Office going up to GM.
- System provides status report of each Go-Down/ALDS/FO/Plant/Supply points/etc.
- System keeps information of Toll Booths along with Toll Charge.

LIQUOR TRANSPORT SYSTEM

Statutory Obligations of Distilleries/Bottlers (Irrespective of compulsory tracking is enforced or not):

- Follow the prescribed routes/Check post, without any diversion.
- Adhere to transit time prescribed by Excise.
- In case of any partial or total loss in transit, penal Excise Duty is charged from Selling Distillery/Bottler,
 - Which is many times of cost of goods
 - Revenue loss on each shipment is to the company as well as the Excise Department
 - Heavy penalties are levied with onus on the Seller
- Distillery/ Bottler able to exercise control on movement of goods in transit and provide better customer Service.
- In case of any genuine need, mechanical failure or traffic diversion, Seller can make alternate arrangements.
- Facilitates better Management control
- Transparency in operation, logistics & generation of tax revenues

Partial GIS/GPS Client List: > 20,000 vehicles & >50,000 km GIS mapped

IndianOil

GIS & GPS based Oil Pipeline Monitoring System: Indian Oil Corp. Ltd.

- SRPL: 1000 + km (was launched by GM at Chennai)
- WRPL : 3000 + km
- GEO-RTD at KASO, MSO, UPSO-II, AOD (7 states)
- VTS & GEO-RTD at Karnataka, Rajasthan & UPSO-II

GIS & GPS based Gas Pipeline Monitoring System: GAIL

- Across 8000 Km of Gas Pipeline across country

VTS & GEO-RTD: Indane Gas

- State of MP
- State of Karnataka
- State of Odisha
- State of UP
- State of Gujarat
- State of Rajasthan

Fleet Management System: L&T

Criminal Monitoring System at MP & Rajasthan Police

Radico Khaitan Ltd.: Liquor Transport System

Fleet Management at Various Transporters across country

Ujjain Smart City – Solid Waste Management Project

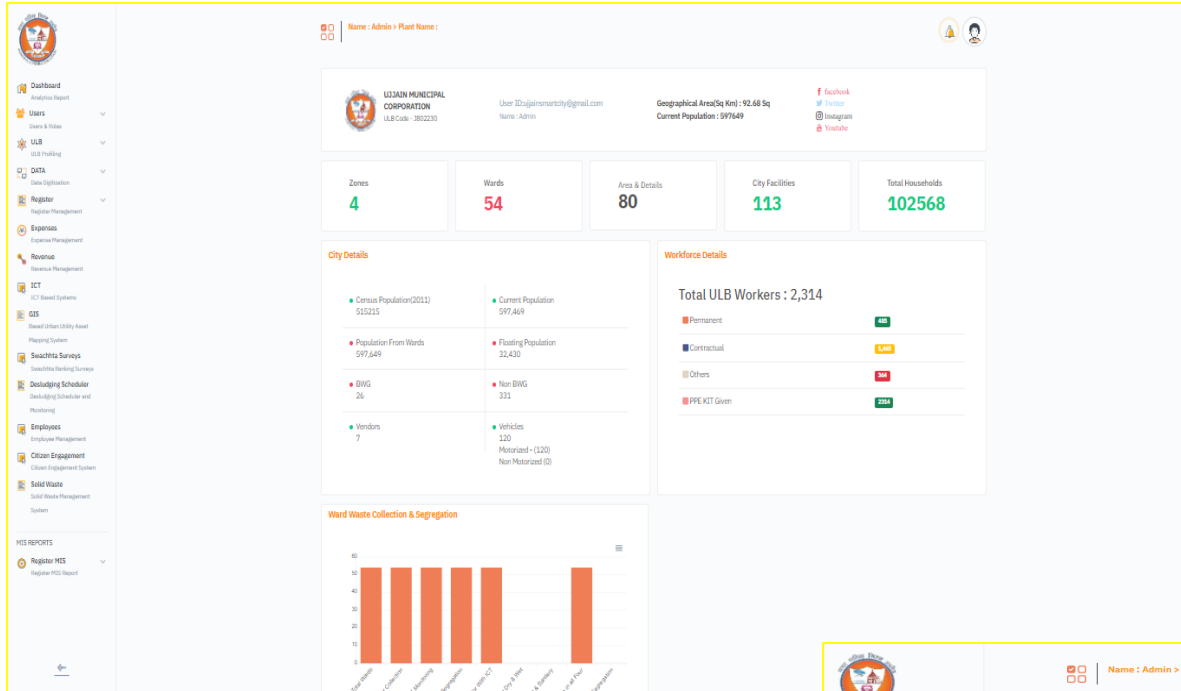

This project aims at Selection of Agency for Deployment of ICT Based Solid Waste Management Software Application along with installation of GPS Devices on vehicles operated for/owned by Ujjain Municipal Corporation. Their main requirement is equipping the municipal vehicles with GPS enabled devices to track real-time movement of these vehicles and organize the process further to optimize their operational efficiency for better public service.

GTI will take over existing Solid Waste management software system and application of UMC and provide Digital platforms (Web Based and Mobile – Android and IOS based) as per scope of work. GTI will supply, install and maintain hardware and software components and provide the necessary support and services. Some of the vehicles of UMC already have GPS devices installed. GTI to install GPS devices for remaining vehicles as identified by USCL / UMC and integrate the existing and newly installed GPS devices with Integrated Solid Waste Management Application.

GTI Infotel have identified a software solution for USCL, for its smooth functioning solid waste management and end-to-end tracking of the vehicles associated with it.

For this, GTI will be developing an integrated solution with GPS based tracking system, provide Digital platforms (Web Based and Mobile – Android and IOS based) for ULB Profiling, Inventory Management, Register Management, GIS based urban utility asset mapping system, swachhta ranking survey, track and monitor all SWM and sanitation vehicles, as well as providing real-time status updates, alert management system, waste transportation management system, waste processing management system, citizen engagement, analysis and evaluation through MIS.
